Mimi's Masks

A note to the wearer –

"Mimi's Masks" was created to provide healthcare workers with comfortable, washable face protection during the COVID-19 pandemic. Please know, your mask was made with love by volunteers throughout Montgomery County, PA. Materials were washed before cutting, but we highly recommend washing/sterilizing before use.

Unlike NIOSH-approved N95s, our fabric face masks are loose-fitting and provide only barrier protection. We have learned that some medical professionals are wearing our masks over N95s and others have been cutting a slit in the mask interior and inserting a disposable liner for added protection. With that said, according to the CDC, these fabric face masks are an acceptable crisis response option when other supplies are not available and require no alterations for that purpose.

From the bottom of our hearts, we appreciate you, your time and your sacrifice during these trying times. Thank you so much for everything you are doing to keep our community healthy and safe. You are our heroes.

With love,
Mimi's Masks
